The series consists of Layer 2 and Layer 3 Fast Ethernet and PoE switches, with advanced features that can accommodate the most demanding applications. Secure, resilient connectivity and the latest traffic-prioritization technologies enhance converged networks. Designed for increased flexibility and scalability, HP 3600 El series switches come with 24 or 48 10/100 ports, four active SFP-based Gigabit Ethernet ports for stacking and uplinks, and a 24-port 100Base-FX switch with two Gigabit Ethernet SFP slots.

## Features and benefits

Quality of Service (QoS)

### Security

- Access control lists (ACLs): provides IP Layer 2 to Layer 4 traffic filtering; supports VLAN ACL and port ACL
- Multiple user authentication methods:
  - O IEEE 802.1X: industry-standard method of user authentication using an IEEE 802.1X supplicant on the client in conjunction with a RADIUS server
