✓ **El crecimiento y la demanda de**
SD-Branch, SD-WAN, 5G

2. ¡Reconocimientos de terceros!

VALIDACIÓN REALIZADA POR TERCEROS

ICSA LABS

**Advanced Threat Defense
(ATD) Q3 2021 Certification**

Capture ATP con RTDMI™ registró una "puntuación perfecta" sin falsos positivos, durante las pruebas ATD Q4 2021 de ICSA Labs.

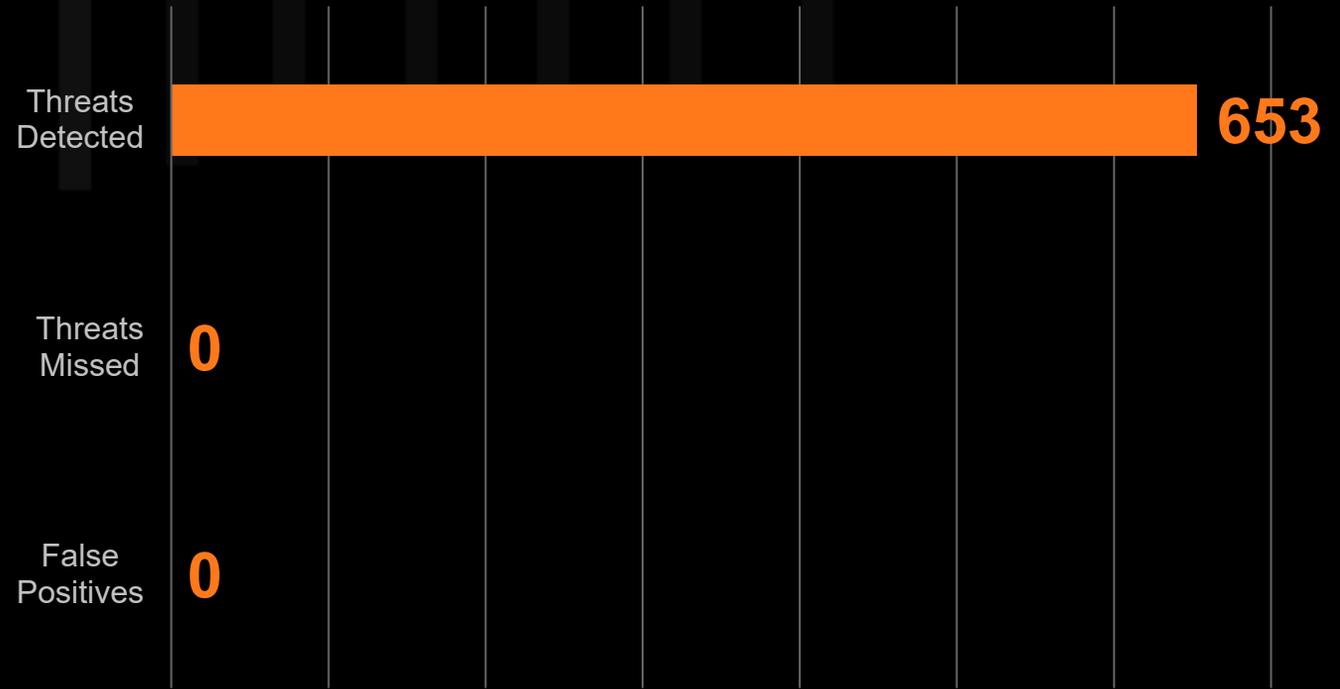

Este es el **perfecto quinto resultado consecutivo** del Capture ATP y la séptima certificación de ICSA Labs ATD en toda su historia.

'PERFECT' THREAT DEFENSE

Capture ATP + RTDMI™

SonicWall Capture ATP con Real-Time Deep Memory Inspection™ patentado superó 28 días consecutivos de rigurosas pruebas realizadas por ICSA Labs durante el tercer trimestre de 2021. ¿El resultado?

Quinta puntuación 'perfecta' consecutiva

Capture ATP detected 653 of 653 new and unknown malicious samples — and with no false positives.

LAS PRUEBAS

- 28 días de pruebas
- 1.348 pruebas totales
- 653 Muestras nuevas y poco conocidas
- 695 Aplicaciones Inócuas

LOS RESULTADOS

- 100% De detección de amenazas desconocidas
- Eficiencia Total contra falsos positivos
- "Quinta puntuación perfecta" consecutiva de un total de siete en la historia.

VALIDACIÓN DE TERCEROS

ICSA LABS

**Advanced Threat Defense
(ATD) Q3 2021 Certification**

Capture ATP con RTDMI™ registró una "puntuación perfecta" sin falsos positivos, durante las pruebas ATD Q4 2021 de ICSA Labs.

Este es el **quinto resultado perfecto consecutivo** del Capture ATP y la séptima certificación de ICSA Labs ATD en toda su historia.

FROST & SULLIVAN

**2021 Competitive Strategy
Leadership Award**

Reservado para empresas a la vanguardia de la innovación e crecimiento en sus respectivas industrias, éste reconocimiento fue otorgado a SonicWall a finales de 2021 por presentar **excelencia en las mejores prácticas** en la industria global de firewall de red.

FROST & SULLIVAN

2021 Competitive Strategy Leadership Award

“

SonicWall lidera el camino en el mercado de firewall de red, redefiniendo con frecuencia su roadmap para ofrecer las mejores soluciones de ciberseguridad y seguridad de red a organizaciones en todos los sectores verticales de la industria, lo que garantiza una mayor eficiencia, seguridad y confiabilidad. SonicWall está estratégicamente posicionado, ampliando su cartera con firewalls on prem, híbridos o virtuales, al tiempo que garantiza rangos de precios flexibles.

SonicWall está realmente comprometida con educar a sus clientes sobre cómo defender su organización de las amenazas de ciberseguridad modernas.

Reservado para empresas a la vanguardia de la innovación e crecimiento en sus respectivas industrias, este reconocimiento fue otorgado a SonicWall a fines de 2021 por presentar **excelencia en las mejores prácticas** en la industria global de firewall de red.

TOLLY GROUP

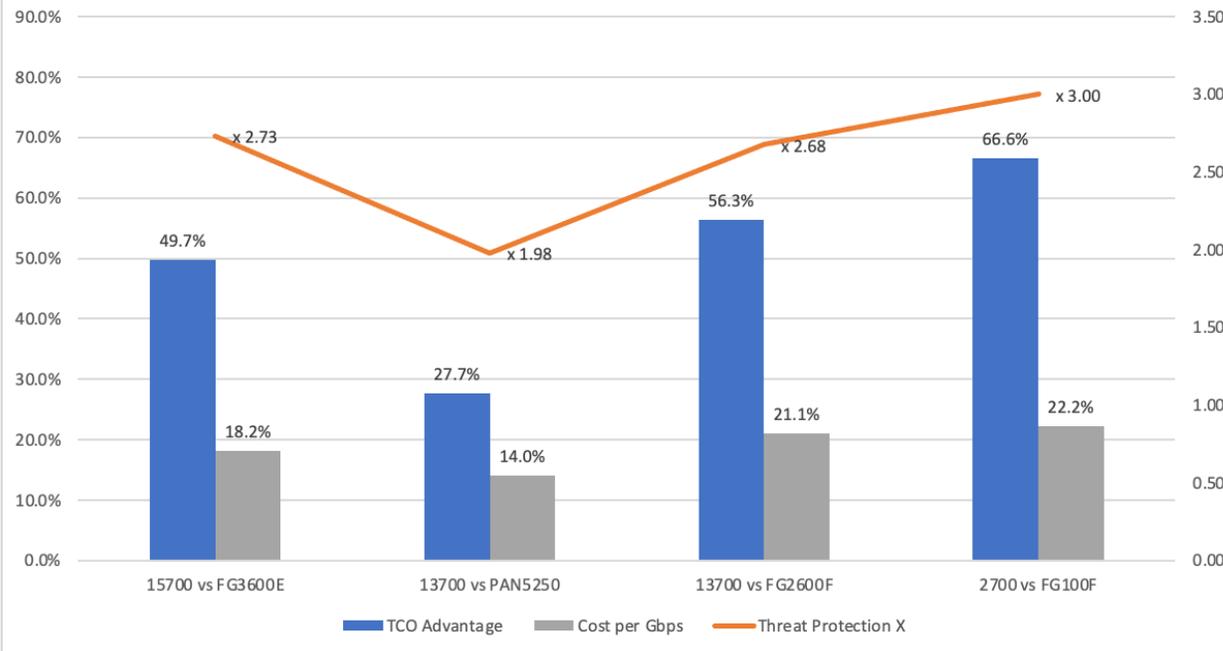

Head-to-Head
Vendor Comparisons

Tolly Group ha probado exhaustivamente los dispositivos SonicWall frente a las ofertas de los principales competidores. Durante el análisis de laboratorio directo, SonicWall proporciona continuamente la **eficacia de la seguridad, costo total y la relación precio/rendimiento general.**

MEJOR TCO Y RELACIÓN PRECIO/RENDIMIENTO

SonicWall vs Competitors

NSsp 15700 vs. Fortinet FG3600E

- 15700 TCO and Cost per Gbps – 49.7% and 18.2% that of FG3600E
- 15700 Threat Protection Throughput – 2.73x higher

NSsp 13700 vs. Palo Alto Networks PAN-5250

- 13700 TCO and Cost per Gbps – 27.7% and 14.0% that of PAN-5250
- 13700 Threat Protection Throughput – 1.98x higher

NSsp 13700 vs. Fortinet FG2600F

- 13700 TCO and Cost per Gbps – 56.3% and 21.1% that of FG2600F
- 13700 Threat Protection Throughput – 2.73x higher

NSsp 2700 vs. Fortinet FG100F

- 2700 TCO and Cost per Gbps – 66.6% and 22.2% that of FG100F
- 2700 Threat Protection Throughput – 3.0x higher

During head-to-head lab analysis, SonicWall continually delivers on security efficacy, total cost and overall price-to-performance ratio

3. ¿Qué esperamos para el 2022?

a. Amenazas

¿QUÉ ESPERAMOS PARA EL 2022?

1. Las empresas deben cuestionar sólo el uso de SIEM
2. Los fallos de las aplicaciones se están empezando a explotar
3. Ataques de Ransomware
 - ✓ 623.3 millones en 2021
 - ✓ +105% de incremento versus 2020
 - ✓ Nuevo enfoque:
 - Objetivos más pequeños, como computadoras de escritorio
 - Pagos más bajos pero a escala
 - ✓ Importancia de Shadow IT de la protección de los puntos finales.
4. Seguro Cibernético será más difícil de conseguir

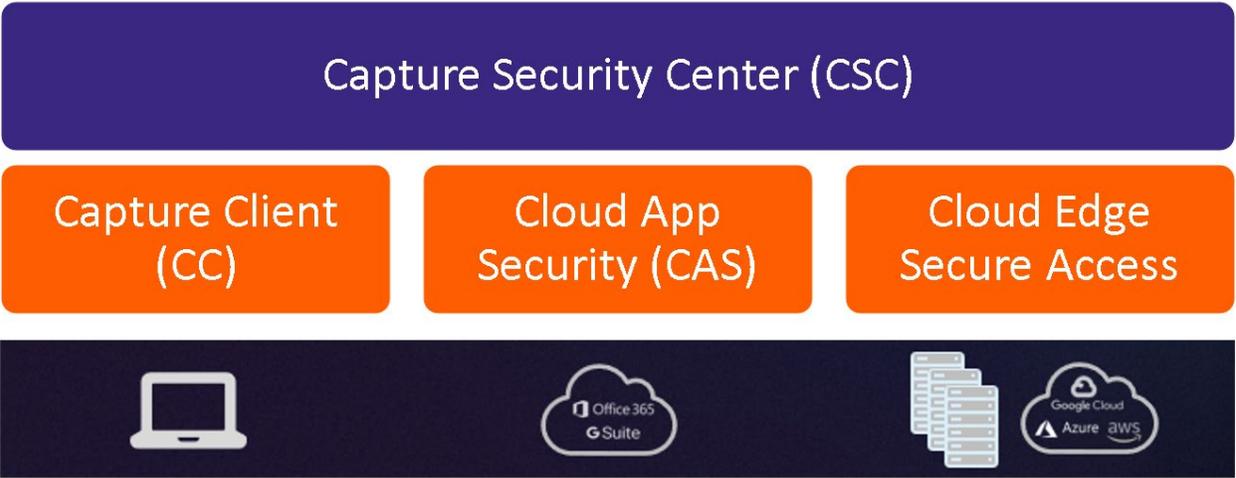

3. ¿Qué esperamos para el 2022?

b. Estrategia de negocio

¿QUÉ ESPERAMOS PARA EL 2022?

1. Fuerza laboral híbrida

NSM + ANALYTICS
Software y soluciones virtualizadas

2. MSSP 3.0

3. Crecimiento previsto para el ejercicio 23 – 22%

- i. Nueva estructuración regional
- ii. Creación de más capacidades con los socios- Cross Selling
- iii. Organizar más actividades copatrocinadas
- iv. Mayor participación en los BID.

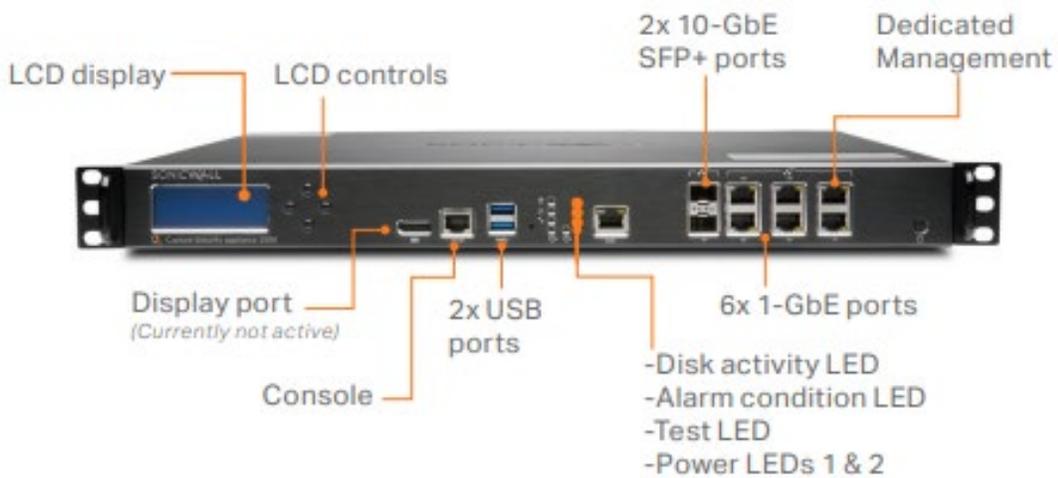

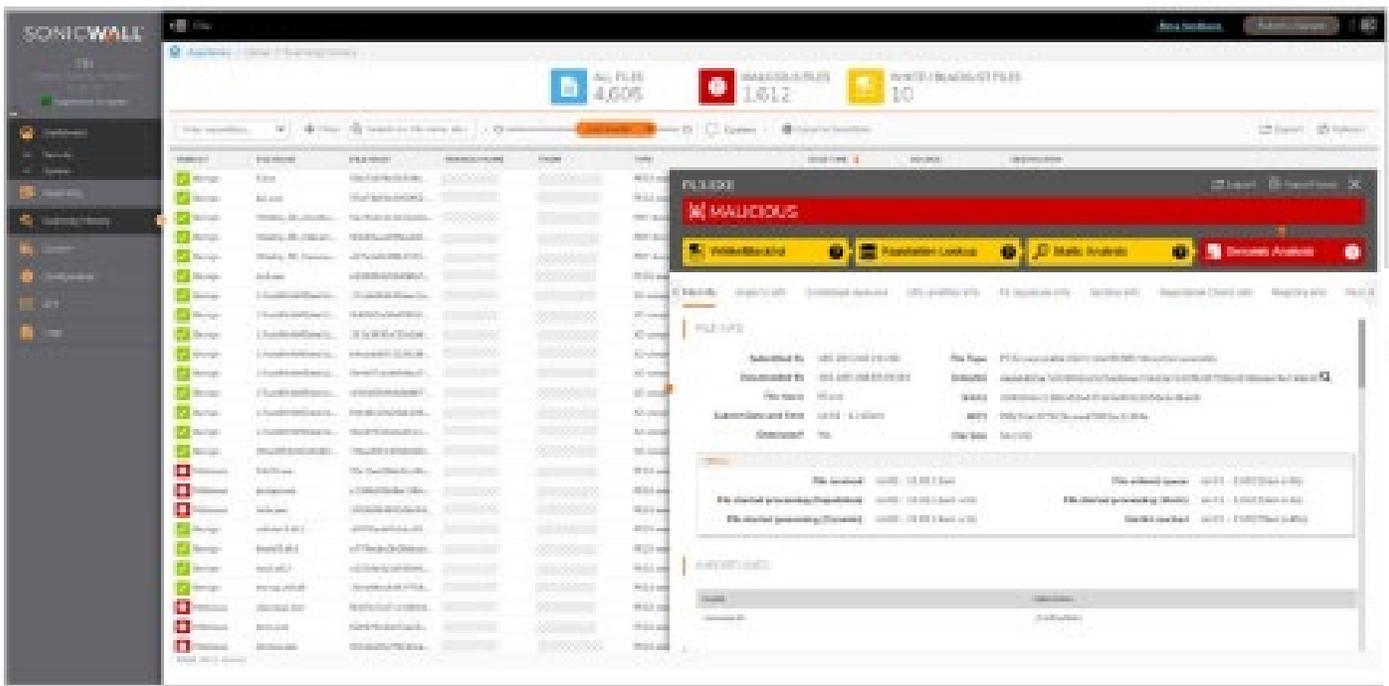

¿QUÉ ESPERAMOS PARA EL 2022?

4. CSa – Capture Security Appliance

- 4 motores diferentes para la identificación de amenazas
 - ❖ RTDMI
 - ❖ 2021, >442,151 nuevas amenazas
 - ❖ 65% más que 2020
- Análisis local.
- Oferta como servicio

4. ¿Nuestro compromiso?

BENEFICIOS DE ESTAR EN CUMPLIMIENTO PARTNER LOCATOR

TYPE OF SPECIALIZATION:

- Endpoint Security
- Cloud Application Security
- Virtual Firewalls
- Secure Mobile Access (SMA)
- Wireless Access Security

A map showing the geographical context of the Partner Locator tool. The map covers parts of Panama, Colombia, and Venezuela. Two orange location pins are placed on the map: one in the western part of Colombia (near Bogotá) and another in the central-eastern part (near Medellín). The map includes labels for major cities like Panama, Medellín, La Paz, and Bogotá, and geographical features like the Pacific Ocean and the Andes mountains. The Mapbox logo is visible in the bottom left corner, and the text '© Mapbox © OpenStreetMap Improve this map' is in the bottom right corner.

MSSP 3.0

CONCEPTO MSSP*

MSSP significa proveedores de servicios de seguridad gestionados. Son empresas que brindan servicios de seguridad administrada a otras empresas, a través de un SOC – Centro de Operaciones.

SONICWALL®

• SecureFirst •

HOW TO APPLY

1- VAYA AL "SECUREFIRST" TAB

The image shows a screenshot of the SonicWall SecureFirst portal. At the top left is the SonicWall logo with the tagline "SecureFirst". A search bar with the placeholder "Pesquisar..." is located at the top center. On the top right, there is a user profile icon labeled "SECUREFIRST D..." and a "CONTACT US" button.

The main navigation bar includes the following items: INÍCIO, REGISTRO DE OPORTUNIDADE, MDF, POSSÍVEIS CLIENTES, TREINAMENTO, CONTEÚDO DE MARKETING, and MAIS. A dropdown menu is open under "MAIS", showing options for "CONTEÚDO DE VENDAS", "SECUREFIRST" (highlighted in yellow and pointed to by a red arrow), and "MSSP".

The page content is divided into several sections:

- Left Column:** A large blue banner for "Importante Guia de Conectividade de Firmware de SMA 100" with a button "LEIA O ARTIGO DA BASE DE CONHECIMENTO". Below it is a video player for "SonicWall Boundless 2022 - I...".
- Middle Column:** A dark blue header "MINHA CONTA DE PARCEIRO". Below it are sections for "MEU NÚMERO DA CONTA" (300657059), "MEU GERENTE DA CONTA" (LATAM Partner Development), "MINHA UNIVERSIDADE" (training and courses), and "MEU MDF" (solicitações).
- Right Column:** A header "OPORTUNIDADES" with a sub-section "OPORTUNIDADES" showing statistics for current and pending businesses. Below that is "RENOVAÇÕES" with a link "Confira suas renovações: aqui". At the bottom of this column is a button "REGISTRAR UMA NOVA OPORTUNIDADE".
- Far Right Column:** A header "NÃO PERCA" with a sub-section "TENDÊNCIAS" listing articles like "BRASIL É O QUINTO PAÍS A MAIS SOFRER ATAQUES DE RANSOMWARE" and "NOVIDADES" listing various newsletters.

CTA - CAPTURE THREAT ASSESSMENT

CTA-SWARM – ENFOCADO EN AMENAZAS

The screenshot displays the SonicWall NSa 4700 web interface. The top navigation bar includes 'NSa 4700', 'HOME', 'MONITOR', 'DEVICE', 'NETWORK', 'OBJECT', and 'POLICY'. The breadcrumb trail is 'nsa4700 / Monitor / AppFlow / CTA Report'. The left sidebar contains a menu with categories: 'Real-Time Charts' (System Monitor, Protocol Monitor, User Monitor, BWM Monitor), 'AppFlow' (AppFlow Report, AppFlow Monitor, CTA Report), 'SDWAN', 'Logs', and 'Tools & Monitors'. The main content area is titled 'Generate & Download CTA Report' and has tabs for 'Advanced Options' and 'Completed Reports'. Under the 'GENERATE' section, there is a 'Since' dropdown menu set to 'Restart' and a 'Generate Report' button. Below this, the 'REPORT' section shows a preview of a report, its filename 'cta-report-18C241001619-20220321.pdf', the date '23:18:05 Mar 20', and the comment 'USR'. A 'Download Latest Report' button is located at the bottom of the report details.

CTA-SWARM – ENFOCADO EN AMENAZAS

EXECUTIVE SUMMARY

CAPTURE THREAT ASSESSMENT REPORT

EXECUTIVE SUMMARY

The Capture Threat Assessment (CTA) Report summarizes the business and security risks facing **Live Demo NSM**. The data used for this analysis was gathered by SONICWALL during the report time period. This report is a snapshot in time of the different threats that have been identified and blocked by your SonicWall next-generation firewall appliance. This report also provides application and user based data that includes top application traffic, top users, top URL categories and session counts to give insight into the traffic mix on your network.

KEY FINDINGS

12 total applications found in use, which presents business and security challenges. When critical functions shift beyond the reach of an enterprise, end users start using non-business-related apps and hackers are using them to distribute threats and steal data.

0 vulnerable applications were observed, which are capable of initiating or hiding malicious activity or establishing unauthorized data transfer.

0 total threats detected on your network, including exploits, spyware, malware and unseen malware, and botnets.

CTA-REPORTE CONFIGURACION

REPORT CONFIGURATION

CAPTURE THREAT ASSESSMENT REPORT

To provide the full set of reports, enable the following options in the management of your SonicWall firewall. If these options are not configured, then the final Capture Threat Assessment report will contain only a subset of all potential data.

Aggregate Reporting

Enabled. Reporting for aggregate data logs enabled.

URL Reporting

Enabled. Reporting for aggregate URL data logs enabled.

GAV Reporting

Enabled. GAV is licensed and GAV status is enabled.

IPS Reporting

Enabled. IPS is licensed and IPS status is enabled.

App IP Reporting

Enabled. Reporting for aggregate app IP data logs enabled.

Capture ATP Reporting

Disabled. Either Capture ATP is not licensed or it is disabled.

App Reporting

Enabled. Reporting for aggregate application data logs enabled.

URL Category Reporting

Enabled. Reporting for aggregate URL category data logs enabled.

Spyware Reporting

Enabled. Spyware is licensed and Spyware status is enabled.

Geo IP Reporting

Enabled. Reporting for aggregate geo IP data logs enabled.

User IP Reporting

Enabled. Reporting for aggregate user IP data logs enabled.
